Applied Statistics and Data Science Certificate

The graduate certificate is designed for students seeking to deepen their statistical knowledge and demonstrate their expertise in statistics beyond the undergraduate level. Students must complete five graduate level statistics courses (15 credits), including Statistical Methods and Regression Methods, and maintain at least a 3.00 GPA. The program prerequisites are the same as for the MS in Applied Statistics and Data Science, but the GRE is not required.

Program: Mathematics and Statistics
Type: Graduate Certificate
