

LTX 7003: Tax. Tax-Exempt Healthcare Orgs

This course addresses and analyzes various federal income tax issues applicable to contemporary transactions involving tax-exempt, non-profit healthcare organizations. Although the course will focus primarily on healthcare organizations, many of the principals covered are applicable to other types of organizations exempt from federal income tax. The course and the issues discussed will be from a transactional practitioner's perspective. As such, transactions will be analyzed to identify relevant federal income tax issues and to arrive at practical legal solutions. During the semester, real and hypothetical transactions involving the latest trends that drive today's healthcare transactions will be examined in the form of case studies and class problems.
